Program Summary

This class will provide students with a general overview of municipal bonds - what they are, why they exist, which entities can issue them, how they are issued, and who buys them. Different types of municipal bonds will be discussed, including general obligation bonds, State contract bonds, moral obligation bonds and revenue bonds. An emphasis will be placed on the conduit type of revenue bonds issued by New Jersey's State-wide bond issuing authorities. A brief introduction to the documentation required for bonds will be provided, including security provisions. The class will explore the Internal Revenue Code provisions that permit the interest on certain municipal bonds to be exempt from federal income tax, including the Code sections and related rules and regulations that set limits on tax-exempt municipal bonds. The course will

also examine federal securities laws and regulations regarding tax-exempt municipal bonds. The course will conclude with a discussion of New Jersey constitutional provisions and statutes impacting the issuance of tax-exempt bonds within the State. This class requires no prior experience with or knowledge of municipal bonds.

Who Should Attend?

Registration for this course is limited to those who have been selected to participate in the State House Series programs. Please do not attempt to register if you have not been notified of your eligibility for this series.
